

I have been a customer of XM for years now, I would expect to hear all of the information they can supply about traffic and weather updates. I dont understand why they would have a problem informing the public of the road and travel conditions in there area. Who are we to say they can't excersise there right to the First Ammendment? If the NAB has full rights to brodcast the exact same material then why is this even an issue? It reminds me of the 3rd grade "you cant do this because i want to" The NAB needs to grow up.

THANK YOU
